

Add-one electronic modules and complete kits RapidBike Easy - Evo - Racing

DESCRIPTION	PRICE	NOTES
RapidBike EASY kit - OEM oxigen sensor modulator with wiring and manual	€ 150,00	Complete kit inclusive of adjustable RapidBike EASY module and connecting wiring specific for the application required. No need for software calibration, all operations are performed with trimmers installed on the module itself - stickers and manual included
RapidBike EVO kit - Fuel Management with O2 modulation, self-adaptive, limiters management Kit inclusive of wiring for applications up to 4 injectors -----	€ 420,00	Complete kit inclusive of programmable RapidBike EVO, connecting wiring specific for the application required and interfacing USB cable to connect the module to a PC - stickers and manual included
Kit inclusive of wiring for applications up to 8 injectors -----	€ 490,00	
RapidBike RACING kit - Fuel and Ignition Management with O2 modulation, self-adaptive, limiters and engine braking management Kit inclusive of wiring for applications up to 4 injectors -----	€ 575,00	Complete kit inclusive of programmable RapidBike RACING, connecting wiring specific for the application required and interfacing USB cable to connect the module to a PC - stickers and manual included
Kit inclusive of wiring for applications up to 8 injectors or expensive cost -----	€ 645,00	
RapidBike Evo Exclusive kit for small engine size - check for specific bike model	€ 300,00	Complete kit inclusive of Rapid Bike EVO or RACING module programmed for a specific bike model, with connecting wiring harness - stickers and manual included (USB cable to connect RB module to a PC available only for separate purchase) - NOT reprogrammable to be installed from one bike model to a different one
RapidBike Evo Exclusive kit for higher engine size - check for specific bike model	€ 350,00	
RapidBike Racing Exclusive kit for smaller engine size - check for specific bike model	€ 400,00	
RapidBike Racing Exclusive kit for higher engine size - check for specific bike model	€ 450,00	

Parts and Accessories

CODE	DESCRIPTION	PRICE	NOTES
Modules			
K27RBEASY	RapidBike EASY module (without wiring)	€ 100,00	RapidBike EASY module
K27RBEVO	RapidBike EVO module (without wiring)	€ 275,00	RapidBike EVO module, inclusive of interfacing cable to connect RapidBike to a PC (F27ADMUSB2)
K27RBRACING	RapidBike RACING module (without wiring)	€ 430,00	RapidBike RACING module, inclusive of interfacing cable to connect RapidBike to a PC (F27ADMUSB2)
Wirings			
Refer to application list	Wirings for RapidBike EASY	€ 50,00	Waterproof wiring harness for RapidBike EASY (specific for bike model)
Refer to application list	Wirings for RapidBike EVO/RACING - up to 4 injectors	€ 145,00	Waterproof wiring harness specific for RapidBike EVO/RACING modules - can be purchased separately
Refer to application list	Wirings for RapidBike EVO/RACING - up to 8 injectors or expensive cost	€ 215,00	The same wiring item is compatible with both, RapidBike EVO and RACING modules
Youtune			
K27YOUTUNE	Calibration device to manage features of RapidBike Evo and Racing modules, and for activating new functions	€ 265,00	For EVO module: AFR parameters, EB, QS management / activation of RPM CRUISE Control For RACING module: same as above / in addition: activation of TRACTION and LAUNCH Control
Accessories			
F27ADMUSB2	FTDI-USB interfacing to connect EVO and RACING modules to a PC	€ 60,00	Included in RapidBike EVO/RACING kit
F27ADORI-ER	By-pass adapter	€ 40,00	Replacing EVO/RACING modules to restore the bike stock configuration without removing RB wiring harness
Handlebar Switches			
F27SWMAPS-ER	Set shifter for handlebar	€ 30,00	Allowing shifting between two sets: injection map, self-adaptive target for RB Evo and Racing Setting RPM and speed limiters, ignition map and engine braking control for RB Racing
F27SWMAPS2-ER	Professional set shifter matt black anodized aluminum for handlebar	€ 90,00	
F27-SW-PIT	Pit-Lane limiter shifter (only for RapidBike Racing)	€ 30,00	Adjustable rpm limiter for speed control in pit lane
F27-SW-PB	Handlebar push button for full control of quick shifting	€ 40,00	Allowing to control RapidBike quick shifter (item F27SWGEAR-ER) without using the clutch lever
Quick shifter			
F27SWGEAR-ER	Load cell sensor with digital console for activate quick shifting	€ 250,00	Lenght mm. 45; diameter mm. 14
C27SHIFTRD-A	Rod type A released in anodized aluminium - Refer to application list	€ 20,00	M6 female (right) - female (left) shift rod
C27SHIFTRD-B	Rod type B released in anodized aluminium - Refer to application list	€ 20,00	M6 male (right) - male (left) shift rod
C27SHIFTRD-C	Rod type C released in anodized aluminium - Refer to application list	€ 20,00	M6 male (right) - female (left) shift rod
C27SHIFTRD-D	Rod type D released in anodized aluminium - Refer to application list	€ 20,00	M8 female (right) - M6 male (left) shift rod
My Tuning Bike: CAN-BUS autotuning module for RapidBike EVO/RACING			
K27MYTB-01	MY TUNING BIKE - CAN-BUS interface kit for permanent autotuning	€ 169,00	Wide band oxygen sensor not included (C27SONDA2)
(K27MYTB-02) (K27MYTB-03) (K27MYTB-04)			In case of additional My Tuning Bike modules installed on the same bike, the codes to order are: K27MYTB-02 (second module), K27MYTB-03 (third module), K27MYTB-04 (fourth module)
C27SONDA2			NET PRICE - For My Tuning Bike (end user)

General terms

Standard delivery terms: Ex Works by Express Courier. All deliveries having a value above 500 Euro are guaranteed against losses with a charge up to 1% applied to the total value showing in the invoice. Prices indicated do not include VAT sales tax. DIMSPORT Srl maintains the right to cancel and/or modify this price list without any prior notice.
